Belted Chamber Machines

Automatic vacuum packaging machines with conveyor belt for industrial use. Full stainless steel construction, robust and easy to sanitize. Vacuum packaging for all type of materials and any kind of product even of large formats thanks to the significant dimensions of the chamber and the sealing bars, guaranteeing a high and efficient production. The wide sealing device mounted on the sealing bars guarantees an airtight seal suitable for autoclave sterilisation. Electric-driven chamber movement to minimize running costs and cut maintenance.

REEPACK BELTED VACUUM CHAMBER PACKAGING MACHINE MODELS AND KEY DIFFERENCES

- **BT 1000** Front and Back Bi-Active Sealing Bar 1000 mm. Distance between bars 600 mm.
- **BT 1350** Front and Back Bi-Active Sealing Bar 1350 mm. Distance between bars 800 mm.

FEATURES & BENEFITS

- Overall control by PLC and colored touch-screen HMI
- Digital control of the vacuum and the sealing temperature
- Bi-active sealing bars in front and back position (independent)
- Electromechanical movement of the vacuum chamber (HMI setting)
- Infeed loading guides
- Motorized conveyor belt with adjustable speed
- High capacity vacuum system for best efficiency and up to 3 cycles per minute with the right pumps configuration
